MUYIWA SUNDAY ALE

39 Ekusi Street, Ondo State, Nigeria | +234 903 578 8355 | oluwamuyiwaale@gmail.com
Portfolio: muyiwa-ale.vercel.app | GitHub: github.com/Oluwamuyiwa01 | LinkedIn: linkedin.com/in/oluwamuyiwa-ale/

PROFESSIONAL SUMMARY

Computer Science graduate with experience in software development, machine learning, computer vision, and predictive modelling. Skilled in developing machine learning solutions and web applications, with additional experience in teaching, research, leadership, and community engagement. Focused on building practical software and intelligent systems that solve real-world problems.

RESEARCH INTEREST

- Machine Learning & Deep Learning
- Computer Vision & Pattern Recognition
- AI for Healthcare Applications
- Real-Time Intelligent Systems
- Software Engineering
- Human-Computer Interaction

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science
Federal University Lokoja, Kogi State, Nigeria
December 2019 - September 2024
CGPA: 4.18/5.00 (Second Class Upper Division)
Thesis: Development of a Deep Learning-Based Static Sign Language Recognition System

RESEARCH, PROJECT & DIGITAL WORK

Deep Learning-Based Static Sign Language Recognition System
Undergraduate Thesis | Computer Vision | Deep Learning | September 2023 - September 2024
GitHub repository: Link

- Designed and trained a Convolutional Neural Network (CNN) for recognising static hand gestures using a custom image dataset.
- Implemented hand detection and real-time gesture tracking using OpenCV and computer vision techniques.
- Developed an interactive interface for demonstrating real-time gesture classification through webcam input.
- Applied image preprocessing, model evaluation, and parameter tuning to improve recognition performance.
- Explored the application of computer vision and deep learning to assistive communication for deaf and hard-of-hearing users.

CNN-Based Eye Disease Classification System
Independent Machine Learning Project | Computer Vision | Medical AI | March 2025 - June 2025
GitHub repository: Link

- Developed a CNN-based image classification model for identifying cataract, glaucoma, diabetic retinopathy, and normal retinal fundus images.
- Prepared and augmented image data to support model training and improve generalisation.
- Achieved 88% test accuracy during model evaluation.
- Deployed the trained model through a Flask-based web application with confidence-based predictions.
- Explored the use of computer vision and deep learning for medical image classification and early screening support.

Predictive Modelling for Drug Abuse Impact on Academic Performance
Independent Machine Learning Project | Predictive Analytics | Classification | January 2025 - March 2025
GitHub repository: Link

- Developed a machine learning solution to investigate the relationship between drug abuse indicators and academic performance.
- Collected and prepared data covering academic, behavioural, and socioeconomic factors for predictive modelling.
- Applied the CRISP-DM methodology to structure the project from data understanding through model evaluation.
- Compared Random Forest, Logistic Regression, Support Vector Machine, and K-Nearest Neighbours classification models.
- Achieved 92% accuracy with Logistic Regression during model evaluation.
- Developed a web-based interface for interactive data input and prediction.

Environmental CDS Giade Website
Community Digital Project | Web Development | July 2026
Website: Link

- Designed and deployed the official website for the Environmental & Climate Action CDS Group in Giade to centralise information about its projects, activities, and initiatives.
- Structured and organised project information into a public-facing digital platform for easier access and communication.
- Collaborated with CDS team members to gather, review, and organise content for publication.
- Maintained and updated the website to keep project information current and accessible.
- Applied HTML, CSS, JavaScript, and web development practices to deliver a practical digital solution for a community organisation

PROFESSIONAL EXPERIENCE

Computer Science Teacher
National Youth Service Corps (NYSC) | Government Day Secondary School, Giade, Bauchi State
October 2025 - August 2026

- Taught Computer Science to senior secondary students, covering programming fundamentals and core computational concepts.
- Designed lesson plans, practical exercises, and assessments aligned with curriculum requirements.
- Guided students in problem-solving, logical reasoning, and analytical thinking.
- Used practical activities to make technical concepts easier for students to understand and apply.

Private Academic Tutor | August 2023 - December 2023

- Delivered personalised Mathematics and English instruction based on individual learning needs.
- Adapted teaching approaches and lesson plans to support students' academic development.
- Provided guidance and feedback to help students improve their understanding of core concepts.

Classroom Teacher
Destiny Academy, Owo, Ondo State | September 2017 - July 2019

- Taught foundational subjects and supported students' development in analytical and problem-solving skills.
- Assisted with classroom activities, lesson preparation, and student engagement.

LEADERSHIP & VOLUNTEERING

President, Environmental & Climate Action CDS Group
Giade, Bauchi State | February 2026 - August 2026

- Coordinated team members in planning and executing community development projects and activities.
- Led the development and launch of the group's official website.
- Managed project information, documentation, and reporting.
- Organised environmental awareness activities and community programmes.
- Coordinated team communication, responsibilities, and project requirements.
- Supported initiatives including environmental clean-up activities and tree-planting programmes.

TECHNICAL SKILLS

Programming & Software Development: Python, Java, JavaScript, HTML, CSS, Git, GitHub

Machine Learning & Data Science: Scikit-learn, TensorFlow, Keras, Pandas, NumPy, Matplotlib

Computer Vision: OpenCV, MediaPipe, cvzone

Data & Information Management: Data Collection, Data Cleaning, Data Processing, Data Analysis, Data Organisation, Data Validation, Information Management, Technical Documentation, Reporting

Development & Data Tools: Visual Studio Code, Jupyter Notebook, Anaconda

Microsoft Office: Microsoft Excel, Word, PowerPoint, Access

IT & Technical Support: Computer Systems, Software Troubleshooting, Software Installation & Configuration, ICT Operations, User Support, Technical Problem-Solving

PROFESSIONAL DEVELOPMENT AND CERTIFICATIONS

Career Essentials in Generative AI - Microsoft and LinkedIn | August 2025

AWS AI Practitioner Challenge - Amazon Web Services **|** June 2026

COMMUNITY

Member: Google Developer Group (GDG) | January 2021 - Present.
